Experience level: Graduate

### Market analyst

We are a business intelligence, research and consultancy company that specialises in the electronics, communications and technology sectors. We have an excellent opportunity for a graduate who wants a successful career in market research involving contact with clients, international travel and variety in their work.

In this role you will:

- Take ownership of projects that typically last up to 6 months to become an 'industry expert' in a technology area
- undertake qualitative and quantitative market research
- communicate closely with clients throughout a project
- manage the production and sale of market research reports
- undertake international travel to conduct research, present to clients or attend trade shows

Key skills for this role are:

- a Business, Economics or related degree with a good ability to grasp technical concepts
- Excellent Excel skills
- Data manipulation skills
- Strong data analysis skills
- An ability to communicate clearly and persuasively
- An ability to manage and organise time effectively
- An ability to be proactive and demonstrate initiative

Again the importance of analysing data is crucial for these types of jobs. The different nature of markets and the failings of markets are analysed in chapters 7-11.

Notice the importance of building your communications skills at university.

This highlights the need to express your ideas clearly in writing.

Your ability to work with people from all over the world is important in business these days.

IT skills are important to show employers.

Economics helps build your ability to analyse data.

You should be able to demonstrate this in relation.

Have you led a project? Got an idea off the ground?

### Competition analyst

We are an independent economics consultancy that specialises in competition policy. Our work involves all aspects of competition economics including mergers and acquisitions, market investigations, abuses of dominant market positions, and price setting.

Monopoly power is examined in chapter 9 and 11.

We provide high quality, professional, independent economic advice, using the latest advances in economic theory and econometrics.

The theory of monopoly and its potential impact on society is examined in chapter 8.

We are employed by many of the world's leading companies to advise on strategic decision taking and help deliver improved their performance and value.

The work we do is intellectually challenging, requiring a variety of different skills, which are developed through a range of on-the job and formal training. The environment is stimulating and supportive, encouraging a creative and rigorous approach to our work.

### Who we are looking for

We are looking for candidates with excellent academic credentials, and strong communication skills.

You will need to show you have worked with others, have written reports and given presentations whilst at university.

Candidates will also need strong inter-personal skills to meet the challenge of working with demanding clients.

You will need to demonstrate your team working skills.
